TRASH CAN ENCLOSURE GUIDELINES

The following are guidelines for creating an attractive trash can enclosure in front of your Village unit. Please submit a request to the Architecture Committee before beginning construction.

1. Enclosure size and material must meet the attached diagram approved by the City of Ann Arbor.
2. Enclosure should be painted the same color as the body of the unit. Paint can be obtained from the Village office.
3. Village maintenance staff is available to paint your trash can enclosure for you on a bill-back basis.
4. One end may be secured to the porch roof post. A post-buried 10 inches into the ground should anchor the other end. It is a good idea to put a rock or piece of concrete into your posthole to prevent the wood post from rotting.
5. Do not put your post into a poured concrete base.
